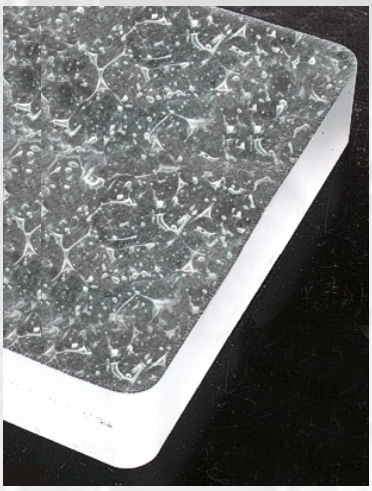
CounterVision

Ultra Thick Glass Countertops

Transform functional Countertop areas into dramatic focal points with the extreme blend of form and function found in CounterVision, glass countertops.

The ultra thick slabs of CounterVision Glass give an entirely new meaning to heavy glass, adding an entirely new dimension to glass as an architectural material. Artistic form and practical function are combined in CounterVision Glass, resulting in a exquisite material certain to create a dramatic focal point in any application. Used as surfacing material for kitchen counters, bath counters, bar tops, transaction counters, reception counters, raised bar and table tops, CounterVision Glass enhances commercial and residential settings alike. Fabrication with cut-outs, shapes and edgework is available to meet your project specifications. Options such as color, surface and imbedded textures make CounterVision an innovative and unique design element.

CounterVision
provides a functional surface and striking display in any setting.



Features

- **Thicknesses**
  1/2" • 3/4" • 1" • 1 1/2" • 2" .
  Custom thicknesses are available by special order.
