

All Glass Entrance Systems

Product description

All Glass entrance systems, by Coral Architectural Products, are designed to add elegance to any architectural project. While beautiful to look at, our systems are highly functional and provide many years of trusted performance.

Our Top and Bottom, center pivots, allow easy door to frame alignment during and after installation. The glass panels are held in place by extruded aluminum fittings. This ensures that the fittings maintain their shape and secure the glass in the glazing pocket. 1/2", 3/8", and 3/4" glass panels are available to meet your projects requirements.
