

IMAGEVISION

IMAGED DECORATIVE GLASS

ImageVision provides an innovative option for decorating glass with permanent, custom images. Utilizing a digital, ceramic frit process, glass with single or multi-color designs is created without sandblasting or screen printing. ImageVision glass is a viable, economical alternative for custom and short run flat glass applications.

Images vary from simple company logos, produced in a single color for a sandblasted appearance, to complex combinations of graphics, photos and text utilizing multiple colors and spanning large areas. ImageVision offers a unique design solutions for commercial and residential spaces, transforming functional glass into a design element with unlimited creative possibilities.

■ FEATURES ON

• CUSTOM DESIGNS

Reproduce most any design imaginable, from logos, text and graphics, to photographs and detailed custom images.

• COST EFFECTIVE

ImageVision glass is cost effective for short runs and low volume projects.

• PERMANENT

Utilizing ceramic frit colorants that bond with glass during tempering, ImageVision glass is durable and permanent.

• DETAIL AND COLOR

Designs may cover the entire surface of glass or specific areas to create highly detailed graphics, signage, and photos. Designs may be produced in a single color or include up to three colors. Images are often produced in a single color (frost) for an etched or sandblasted appearance.

• HYGIENIC

ImageVision glass is hygienic and easy to clean. Designs are resistant to fingerprints for low maintenance and high clarity.
